## Profile Summary

I am a self-motivated and enthusiastic frontend developer with a passion for software engineering and am eager to contribute to team success in a thriving, exciting, and growing company through hard work, attention to detail, and excellent organizational skills. With less than two years of experience, I understand web development and the tools required. I am motivated to grow, excel, learn and unlearn while giving my utmost best to my employer.

## Education

### Federal University of Technology Akure

B.Eng in Information and Communication Technology.

Coursework in Software Development Techniques, Agile, Software Development Life cycle, Software Development Techniques, Case tools, Computer Science.

Current CGPA: 4.66

Ondo, Nigeria

2018-2024

## Work Experience

### Empower Her Community

Frontend Developer (Volunteer)

Lagos, Nigeria

June 2022 - Present

- Collaborating with other developers to ensure the technical feasibility of UI/UX designs.
- Developing, debugging, and testing reusable code.
- Using Slack for communication, Git for version control, and Github to collaborate.
- Collaborated with another developer to build a task productivity app with React and Firebase( <https://ehc-todoapp.web.app/> ).

### Weixel Tech

Frontend Developer Intern

Ondo, Nigeria

April 2021 - Nov 2021

- Collaborated with other frontend engineers during development processes to confirm creative proposals, design, and code for the right solutions for a defined problem.
- Coded using HTML, CSS, and JavaScript to develop features for both mobile and desktop platforms.
- Exercised my communication skills by keeping in touch with my supervisor throughout the project's lifecycle via email and slack.
- Researched emerging web technologies for possible incorporation into products

### Bright Network

Technology Intern

London, UK

Dec 2020 - Jan 2021

- Learned SDLC best practices within an Agile software environment to produce rapid iterations for clients.
- Learned the importance of effective communication and time management in teamwork.
- Delivered the final task in time by exercising my time-management skill.
- Worked on a presentation that involved pitching a new software and summarizing the project's life cycle.
